Tutors advise learners of the activities relevant to each course in course outlines.

In order to complete this programme students must complete a work experience component as part of course FC4203 Advanced bakery and patisserie techniques. The workplace learning is augmented by student directed learning and experience in the workplace, by way of work based assignments.

- Workplace learning
- Arrangements for workplace learning involves consultation between the students, tutorial team and industry.
- Evaluation of worksite ensures that it is appropriate as a learning delivery site, including health and safety policies.

To best prepare students for assessment of practical items, ongoing formative assessment activities is used prior to summative assessments. This process has been introduced into the current cookery programmes and has been

received very well with learners and tutorial staff by enabling learners to demonstrate their skills and get valuable feedback on their work in advance of the summative assessment events.

Underpinning theory is delivered throughout the courses and is integrated and developed within practical applications. Learners are guided throughout the programme and receive feedback to support the development of their skills, knowledge and attributes.

Assessment of underpinning theory, where appropriate is through Moodle and open book assessment.
