Programme Outline

This 120-credit programme enables students to build on their previous learning and experience and develop, apply and integrate the knowledge and advanced skills needed to be effective within the cookery sector of a commercial hospitality environment.

The programme comprises eight 15-credit courses. Collectively, course learning outcomes and their underpinning assessment criteria ensure that students successfully completing the programme meet the graduate profile requirements for the New Zealand Diploma in Cookery (Advanced), (Level 5) with strand in Cookery.

The sequence of learning through the programme ensures students progressively develop key skills and underpinning knowledge prior to their specific application in an integrated way.

Industry speakers from different hospitality sectors and visits to local restaurants underpin classroom teaching and inform practical work situations.

To ensure the graduate profile of this qualification is met, the learning outcomes throughout the programme are measured and assessed by a range of assessments the have been mapped against the qualification specifications of the graduate profile. The programme has eight courses delivered over two trimesters, each of which covers different elements of the learning required to meet the graduate profile of the qualification. Four courses deal with staffing, operational, and compliance roles. Four courses cover specialist areas of cookery.

The programme structure enables students to develop hospitality industry skills and knowledge as well as practical application of those skills.

In order to complete this programme students must complete the Work Integrated Learning course. The workplace learning will be augmented by student directed learning and a work based assignment.

- Workplace learning, including the monitoring of students.
- Arrangements for workplace learning involves consultation between the student, tutorial team and industry.

Teaching and Learning Methods

This programme includes a mixed mode delivery and may include tutorials, workshops, group activities, projects, class presentations, assignments, field trips, web enhanced learning, workplace practicum and self-directed learning.

Assessments

Assessments are achievement based against course learning outcomes and assessment criteria.

As indicated by the focus of the learning outcomes and assessment criteria, application of skills and knowledge is ensured through use of assignments and practical assessments that reflect or require interaction with commercial hospitality workplace contexts and processes.

Assessments are developed and marked by WelTec staff and each student's progress is monitored through assessment completion and sample work for each assessment is kept on file by WelTec.
